

Abiodun Caleb Adesesan

+2349063273029 • abiodunadesesan@gmail.com • linkedin.com/in/abioduncaleb • github.com/abiodunadesesan

PROFILE SUMMARY

- Software Developer with 1+ year experience building scalable web systems, REST APIs and cloud-based solutions.
- Transitioning into Artificial Intelligence and Machine Learning with hands-on training in Generative AI and AI Agents.
- Completed certifications and badges in AI/GenAI from IBM, Meta, Oracle, NVIDIA, Databricks and Institute of Applied Technology.
- Portfolio of real-world projects (microservices, CRM automation, cloud deployment). GitHub: github.com/abiodunadesesan

EDUCATION

National Diploma, Electrical and Electronics Engineering Moshood Abiola Polytechnic	2016 – 2018 Nigeria
Bachelor of Engineering (B.E.), Software Engineering Final International University	Feb 2019 – Feb 2025 Kyrenia, Cyprus

AI / ML SKILLS

- Machine Learning fundamentals: supervised & unsupervised learning, evaluation metrics
- Generative AI: prompt engineering, LLM workflows, GenAI fundamentals (NVIDIA / Databricks training)
- AI Agents: tool use concepts, multi-step task execution (Databricks AI Agent Fundamentals)
- Cloud & deployment fundamentals (IBM Cloud Computing Fundamentals), Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Backend engineering: REST APIs, integration testing, scalable services (IBM Back-End Development)
- Applied Machine Learning: Predictive Modeling, Intent Classification, Multi-Dimensional Clustering, Semantic Representation, Baseline Performance Optimization.
- Search Intelligence Metrics: Semantic Vector Embeddings, Opportunity Scoring Matrices, Metric Evaluation (Precision@50), Client-Based Data Partitioning
- Data Pipelines & Engineering: Complex Dataset Wrangling, Multi-Table Relational Schema Joins, Missing Value Handling, Tokenized Feature Preprocessing.
- Analytics Workflows: Reproducible Notebook Architectures, Insight-to-Action Reporting, Business Decision Modeling, AI Agentic Context Exploration.

PROJECTS

eFinny Multi-Mode Full-Stack Social Networking App	Live: efinny.vercel.app
• Developed a full-stack Next.js application implementing a dynamic, context-aware interface switcher supporting isolated Dating, BFF, and Bizz professional discovery modes. • Managing a connection pooler via Upstash Redis to securely maintain real-time user state, presence, and chat structures • Integrated secure verification pipelines alongside Clerk Auth and customized Postgres triggers to securely map third-party identities with relational database tables. • Configured automated Vercel Cron background infrastructure executing daily data maintenance, match-expiry routines, and low-latency asynchronous Web Push notification dispatches. • Engineered native in-app audio and video data calls by implementing real-time WebRTC communications powered via the Daily.co streaming API infrastructure.	
Aproko AI AI-Native Productivity Operating System	Live: aprokoai.vercel.app
• Architected a production-grade AI SaaS monorepo using Turborepo to structure decoupled frontend applications, backend services, and isolated shared configurations. • Designed a multi-model retrieval pipeline parsing complex files (PDF, DOCX, PPT) into contextual text chunks with localized OCR support and automated source citations. • Engineered a secure relational storage architecture utilizing Supabase schemas for document management alongside local vector data isolation pipelines. • Deployed a resilient web ecosystem onto Vercel, optimizing route processing speeds and state sync mechanics across real-time AI knowledge workspaces.	
HubSpot CRM Automation / API Integrations	
• Built integrations and backend APIs to automate CRM workflows and sales tracking. • Improved operational efficiency by reducing manual processing. • Tech: Node.js, HubSpot API, Firebase Functions, Postman	

PROJECTS

Study-Planner (Microservices Architecture)	Scalable architecture divided into independent services
• Schedule Management: plan daily, weekly, or semester tasks • Task Notifications: send reminders for deadlines & tasks • Cross-Platform Access: supports usage on web and mobile • Scalable Architecture: uses microservices to isolate responsibilities and improve reliability	
Contact Management Application	CRUD System
• Allows users to store, view, edit, and delete contact information • include validation (unique emails, phone numbers) • Uses a structured UI (form input fields) and data persistence	
Website Design and Development	Full-stack web development
Study In North Cyprus	Live: studyinn.com
Paris American International University	Live: parisamerican.org
Study In Kazakhstan	Live: studyinkzk.com
• Directly involved in designing, developing, and maintaining our company's websites. • Creating user-friendly interfaces, ensuring responsive layouts across devices, and maintaining site functionality. • Focused on delivering professional, accessible, and reliable platforms for Paris American International University, Study in Kazakhstan, and Study in North Cyprus.	
Capstone Project: E-commerce platform	Full-stack web application
Final International University	(2025)
• Designed user interface and shopping experience • Integrated product catalog, cart, and checkout system • user authentication & authorization • Focused on scalability and responsive design	

PROFESSIONAL EXPERIENCE

Machine Learning Engineering Intern	July 2026 – August 2026
FlyRank AI	Remote
• Engineered end-to-end machine learning pipelines to model complex search ranking behaviors and optimize content discoverability vectors. • Developed advanced data preprocessing architectures, utilizing tokenized embeddings and intent classification models to replace rigid, rule-based algorithmic baselines. • Implemented predictive opportunity scoring matrices and data clustering scripts using Python to translate multi-dimensional datasets into actionable business recommendations.	
Web Developer	Sep 2022 – Nov 2022
Arekan Bilgi Teknolojileri Ltd.	Cyprus
• Contributed to the development of web-based platforms and user-focused solutions. • Assisted with frontend and backend development to support client requirements.	
Software Developer	Dec 2024 – Present
Study in North Cyprus	Girne, Kyrenia, Cyprus
• Designed and implemented RESTful APIs using Node.js, ensuring secure and scalable server-side architecture. • Utilized Postman for API testing and debugging, ensuring seamless integration with third-party services. • Deployed backend services on Firebase for real-time database updates and cloud storage. • Integrated company workflows with HubSpot to streamline CRM and sales tracking. • Collaborated with cross-functional teams to deliver high-quality software solutions on time.	

TECHNICAL SKILLS

- Languages & Frameworks: C++, JavaScript (React, Node.js, Next js), Typescript, Tailwind CSS
- Tools & Platforms: Cursor , Anti-gravity, HubSpot, Git, Postman, Clerk, Sentry, Render, Playwright , Vercel, Cloudflare , Storybook, PostHog, Prisma ORM
- UI/UX: Figma, Responsive Design, User-Centered Interfaces, Motion Framer, Google Stitch, Shadcn UI
- Cloud & Databases: Cloud Computing, SaaS Integration, Firebase, Supabase, Cloudflare
- Prompt Engineering

CERTIFICATIONS

- Cloud Computing Fundamentals (IBM)
- Front-End Web Development Certification (IBM)
- Artificial Intelligence Fundamentals (IBM)
- Introduction to Front-End Development (META)
- Artificial Intelligence Engineering (IBM)
- Introduction to Artificial Intelligence (Institute of Applied Technology)
- Introduction to SQL (Institute of Applied Technology)
- AI for All: From Basics to GenAI Practice (NVIDIA Academy)
- Databricks Accredited AI Agent Fundamentals (Databricks Academy)
- Databricks Accredited Generative AI Fundamentals (Databricks Academy)
- Javascript Essentials (Cisco)
- Back-End Development (IBM)
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Anthropic Academy – Certified in Claude API Development & MCP Tool Architecture
- Anthropic Academy – Certified in Claude Code Workflow Automation
- FlyRank Certified AI/ML Practitioner – Machine Learning & Applied Search Intelligence

PROFESSIONAL DEVELOPMENT

- Continuous self-learning on emerging web technologies and SaaS solutions. development
- Participating in workshops and online courses to enhance expertise in full-stack
- UI&UX designing
- AI&ML

LANGUAGES

- English: Fluent
- French: Basic Conversational
- Turkish: Elementary
